

Which booster vaccine might I get?

Booster choice is not limited to what was received in the primary series.¹

Canada's National Advisory Committee on Immunization (NACI) recommends an mRNA COVID-19 booster dose, regardless of what was received in the primary series.²

SPIKEVAX, previously known as COVID-19 Vaccine Moderna, is an mRNA vaccine.

SPIKEVAX may be administered as a single booster dose at least 6 months after completion of the primary series for those 18 years and older.³

Get the facts about the SPIKEVAX mRNA booster and talk to your doctor.
